

Institut Guillem Catà is willing to establish academic, cultural and scientific relationships with national and international organizations and institutions in order to promote the international mobility of our students. Once a year a report will be made with conclusions of the supervision and assessments. Correction measures will be applied in case the targets are not reached.

### **Selection of partners**

Partners will be chosen according to their catalogue of studies. We are looking for schools with Short Cycles equivalent to our own and that are willing to engage in a mobility programme. This can be done through the Regional Ministry of Education or through the e-twinning net .

### **Geographical areas**

We are interested in finding neighbouring countries, especially English speaking countries or countries where English is taught as a foreign language.

### **Goals**

- Establishing at least one mobility programme between 2014 and 2020.
- Updating our web page in order to publicize our institution abroad.
- Promoting the students' awareness of the needs of the international labour market.
- Improving the students' knowledge of the international economic and cultural scene.
- Establishing contacts with companies within the EU.
- Promoting 'shadowing' and bench marking experiences to our staff.
- Improving our students' communicative skills when it comes to foreign languages.

### **Target groups**

The mobilities will be aimed at Short Cycle students who want to complete their training abroad and to staff members who are willing to train and shadow the teaching techniques in other countries.
